Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 03 June 2005.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 6/3/2005 has been entered.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 2, and 5-11 are rejected under 35 U.S.C. 102(b) as being anticipated by Kanou et al. Kanou discloses a sheet post processing apparatus that includes a first crease forming unit (351); a second crease forming unit (353); a first abutting member (313); a second abutting member (322); first driving device (see col. 8, line 57); second driving device (see col. 9, line 5); a controller (see col. 8-10); and a sheet convey path (31, 32, 33, 34) that guides a to the first crease forming unit (351) and then to the second crease forming unit (353).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person

Art Unit: 3651

having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 3-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Cross et al. in view of Kanou. Cross discloses a sheet post processing apparatus that includes a first crease forming blade (H,C); a second crease forming unit (J,I); a first abutting member (G); and a second abutting member (t). Cross discloses all the limitations of the claims, but it does not disclose a first driving device, a second driving device, and a controller. However, Kanou discloses a sheet post processing apparatus that includes first driving device (see col. 8, line 57); a second driving device (see col. 9, line 5); and a controller (see col. 8-10) for the purpose of automatically setting the abutting members based on the size of the sheet. It would have been obvious for a person of ordinary skill in the art at the time of the applicant's invention to modify Cross by utilizing a first driving device, a second driving device, and a controller for the purpose of automatically setting the abutting members based on the size of the sheet.

Response to Arguments

5. Applicant's arguments filed 6/3/2005 have been fully considered but they are not persuasive. The applicant states neither of the cited references, U. S. Patent No. 5,769,404 nor U. S. Patent No. 240,390 (issued 1881), discloses moving first and second abutting members in a predetermined position to conduct a threefold process or a Z-fold process so as each process is executable in the same sheet convey path. In response, see U.S. 5,769,404 (Kanou) at least at col. 8, line 48 – col. 11, line 20.
